

Training Officer Express - Quick Training

Decision Making Skills

Recognition Primed Decision Making is based on the concept of Naturalistic Decision Making (making decisions in your natural environment and developed by the US military).

8 Step Process to apply to all training drills:

- 1. Conduct a Rapid Size Up**
- 2. Focus on the most relevant information**
- 3. Compare to what is typical**
- 4. Run mental models**
- 5. Form expectation of outcome**
- 6. Detect unusual situations**
- 7. Make the decision**
- 8. Repeat**

On the incident scene this has to occur in seconds and is a continuous process, without training this does not happen.
