

Training Officer Express - Quick Training

TIC Interpretation

How well do you know what you are looking at?

Do your FF's know the same?

Tips of the Trade

- Comes off apparatus every time*
- Understand the modes of your TIC*
- Practice looking at different objects in non-IDLH*
- Use a 6 point scan*
- Understand color scheme on screen*
- TICs do not see through objects*
- TICs measure surface temperatures*
- TIC will reflect shiny objects (glass, tin, refrigerator, etc)*
- Allow TIC to catch up and calibrate as you move*
- Allow TIC to calibrate ambient temperature prior to placing in superheated environment.*
